Senior Content Designer with 6+ years across editorial, product, and AI content, working across the full stack of product language and content systems, from microcopy and content models to taxonomy, governance, terminology, and agentic AI experiences.

- **25% lift in conversions**
- **30% faster design time**
- **35% faster content production**

EXPERIENCE

Content Design and Systems Lead

2023 – 2026 · Remote · Full-time

Moniger

B2C fintech, a multi-bank money management platform

- Built and led the content design, content strategy, and language systems practice from the ground up, setting direction on content models, taxonomy, style guides, and governance standards adopted across the organization.
- Translated complex, regulated financial information into clear, empathetic, plain-language content, partnering with Legal and Compliance to ship accurate, compliant experiences without sacrificing clarity.
- Led the brand redesign, directing creative brand designers and evolving the content style guide with brand, marketing, and communications into one cohesive verbal and visual identity.
- Designed an end-to-end help center and journey-mapped knowledge base across every stage of the user journey.
- Increased conversions 25% and reduced onboarding drop-off 8% through content design, refined information architecture, and research-driven UX writing; improved navigation efficiency 15% with reusable content frameworks.

UX Writer and Content Strategist

Dec 2024 – Jan 2026 · Houston, USA · Part-time, Volunteer

Culangex

Gaming and edtech platform

- Owned product language end to end for a gaming-edtech platform, from discovery and journey mapping through UX writing and microcopy in Figma, launch, and post-launch measurement and iteration.
- Built the content design system and language infrastructure, including content models, voice and style standards, and reusable patterns, that cut production time 35% and lifted user comprehension 28%.
- Governed all user-facing language, from UI microcopy and onboarding to product emails and help content, holding voice and quality consistent at scale.
- Led a team of 3 content designers and partnered with Product, Design, Engineering, and curriculum educators on content direction and comprehension goals.

Content Designer

2024 · Remote · Contract

FastTrackUX

Edtech platform

- Redesigned the landing page with research-led content, nearly doubling student logins by bridging two very different audiences in one clear voice.
- Built the platform's content design system, reducing design time 30% and establishing reusable patterns and structured content pipelines.
- Improved UX taxonomy and information architecture with content-first prototypes that reduced friction and improved user progression.

Senior Content Designer

Jan 2019 – Present · Remote

Independent

Voxra, an AI governance layer for safe, on-voice product language at scale

- Building Voxra, an AI governance layer that reviews AI- and human-drafted content against product voice, approved terminology, and risk boundaries, correcting and explaining its reasoning, and escalating to a human when confidence drops.
- Design the full agentic content system end to end: agent voice and persona, dialogue and fallback flows, system prompts, guardrail specifications, and evaluation rubrics.
- Deliver content design and language systems for fintech, edtech, and e-commerce startups, including content audits, information architecture, onboarding flows, and style guides.

SELECTED PROJECTS

Voxra

Language Infrastructure & Agentic Content Design

AI governance layer for consistent, compliant, safe-to-ship product language across AI- and human-written content.

Moniger Mobile App

Content Design, Knowledge Base & Content Strategy

End-to-end content design, help documentation, and journey-mapped knowledge base for a multi-bank fintech app.

NAITS

Website · UX Content

Designed the UX content for the NAITS website, structuring information and messaging for clarity.

Babelos

Website · Content Strategy & UX Content

Developed the content strategy and UX content for Babelos, a clearer product story for a multilingual platform.

Culangex Content Design System

Content Design System & UX Content Strategy

Content models, voice and tone standards, and reusable patterns for gaming and edtech interfaces.

Oduko

Web App & Landing Page · UX Writing

Designed the UX writing across Oduko's web app, creating clearer product flows and a more cohesive experience.

MUTA

Website · Content Design

Designed the content experience for the MUTA website: information architecture, messaging, and interface content.

IDASHYOU

Web App & Website · Content Design

Designed content across the IDASHYOU web app and website, creating a consistent product language.

FRAMEWORKS & METHODS

Content Architecture
Structuring content and wireframes around what users actually need to understand.

Language Governance
Rules for voice, tone, terminology, and naming that keep product language consistent at scale.

Audience Language Mapping
Identifying language needs shared or differentiated across audiences without fragmenting the experience.

Content Learning Loops
Shipping research-informed content, testing it in context, and using evidence to refine it.

Action Language Design
Designing the language of actions, labels, and system states so people and AI systems know what's happening.

Agent Behavior & Trust
Language and interaction patterns that shape how AI systems communicate intent, uncertainty, and outcomes.
